#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 6, 7, 18, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Kanehara et al (US 5,427,579).

Kanehara et al disclose a transmission comprising: a thrust ratio between the thrust of the driving pulley and the thrust of the following pulley is determined (col. 1 lines 19-27), the state of change of the thrust ratio is determined while a driving torque is varied according to a predetermined cycle (paragraph 54) and thrust of at least one of the driving pulley and the following pulley is controlled based on a state of change of the thrust ratio (col. 2 lines 34-59).

Re claim 2, the pulley thrust is controlled such that the thrust ratio approaches a point at which the gradient of change of the thrust ratio changes (see Fig 6).

Re claim 6, the state of change of the thrust ratio is determined while the pulley thrust is varied according to a predetermined cycle by measuring a hydraulic pressure (col. 2 lines 34-59).

Re claim 7, the thrust ratio is determined by measuring a hydraulic pressure, which controls thrust of the driving pulley and the following pulley (col. 2 lines 34-59).

Re claim 18, the state of change of the thrust ratio is determined while a driving torque is varied (see Fig 18).

Re claim 19, the state of change of the thrust ratio is determined while a driving torque is varied according to a predetermined cycle (col.14 lines 5-66).

***Allowable Subject Matter***

3. Claims 3-5 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

4. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
